ADANI INSTITUTE OF
DIGITAL TECHNOLOGY MANAGEMENT

STUDENT HANDBOOK

UniPilot Knowledge Base Edition

PGDM – Big Data Analytics (BDA)
PGDM – Artificial Intelligence & Data Science (AI & DS)
Batch 2025–27

Prepared for: UniPilot – Agentic AI Student Support Assistant

DRAFT FOR ACADEMIC PROJECT / DEMONSTRATION USE

This handbook combines information extracted from available AIDTM academic documents with clearly labelled illustrative sample guidance. It is not an official institute publication.

Important Notice & How to Use This Handbook

Document status: Student-support knowledge-base draft prepared for the UniPilot academic project. The institute name and programme names are used to identify the intended context; this document must not be represented as an official AIDTM-issued handbook.

Verified source material used: the available AIDTM academic plan for PGDM Big Data Analytics and the document titled “Policy for Summer Internship Program (SIP), Industrial Capstone Project & Placements”, applicable to PGDM BDA and AI & DS, Batch 2025–27.

Illustrative content: sections on attendance, examinations, academic integrity, leave, hostel, transport, student support, and general campus conduct are sample guidance written to make the assistant useful for demonstration. They are not verified AIDTM rules.

UniPilot response rule

When a student asks about a verified policy, UniPilot should answer from the cited source document. When a student asks about an illustrative section, UniPilot must say that it is sample guidance and direct the student to the Programme Office or relevant institute authority for the current official rule. If a detail is not available, UniPilot should say so instead of inventing a deadline, percentage, fine, or penalty.

Version: Draft 1.0 | Prepared: October 2026

Contents

1. About AIDTM and the PGDM Programmes
2. Academic Planning and Learning
3. Attendance & Classroom Participation (Illustrative)
4. Examinations & Assessment (Illustrative)
5. Academic Integrity & Responsible AI Use (Illustrative)
6. Leave, Absence & Student Support (Illustrative)
7. Campus, Hostel & Transport Guidance (Illustrative)
8. SIP, Industrial Capstone & Placement Policy (Source-based)
9. Student Conduct, Communication & Wellbeing (Illustrative)
10. UniPilot – Frequently Asked Questions
11. Source Register and Verification Notes

1. About AIDTM and the PGDM Programmes

Adani Institute of Digital Technology Management (AIDTM) is the institute context for this student-support handbook draft. The available policy document identifies two programmes covered by the combined SIP, Industrial Capstone Project and Placement Policy:

• PGDM – Big Data Analytics (BDA).

• PGDM – Artificial Intelligence and Data Science (AI & DS).

The available combined policy is for Batch 2025–27 and states that it applies to students of both programmes. Students should use the latest communication from the Institute for current academic dates, programme requirements, and amendments.

Using programme information

The academic-plan document available for this project contains BDA trimester/course information. It may be used by UniPilot to answer questions about listed subjects and academic-plan details. The current knowledge base does not establish that every course, timetable, credit value, or trimester detail applies identically to AI & DS.

Who should students contact?

For a decision that affects registration, grades, attendance, examinations, internship eligibility, placement participation, or disciplinary status, students should confirm with the Programme Office or the designated institute authority. UniPilot is an informational assistant and does not replace an official institute decision.

2. Academic Planning and Learning

A postgraduate management programme may include classroom learning, practical work, projects, presentations, assessments, and industry exposure. The exact course list, credit structure, trimester schedule, and academic calendar must be taken from the applicable programme document and latest institute notice.

Study and assignment practices – illustrative guidance

• Read the course outline and assignment instructions before beginning work.

• Keep track of submission dates communicated by the course instructor or Programme Office.

• Maintain copies of submitted assignments, project files, and feedback.

• Use institute-approved platforms and follow the instructor's format and citation requirements.

• Ask the course instructor for clarification when an instruction is unclear.

Academic plan lookup

If UniPilot retrieves a subject or trimester detail from the uploaded academic plan, it should name the source and page where possible. If the requested programme or term is not covered by the available file, it should clearly state that the information was not found in the current knowledge base.

3. Attendance & Classroom Participation

ILLUSTRATIVE SAMPLE POLICY – NOT AN OFFICIAL AIDTM RULE

Students are expected to attend scheduled lectures, labs, workshops, presentations, and other required academic activities. Attendance may be recorded by the instructor or through an institute-approved system.

Suggested student practices

• Check the timetable and official class-group announcements regularly.

• Inform the relevant faculty member or Programme Office when an unavoidable absence occurs.

• Keep supporting documents for genuine medical or emergency absence, if requested by the Institute.

• Do not assume that submitting a leave request automatically changes attendance records.

• Confirm the applicable attendance threshold, condonation process, and consequences directly with the Programme Office.

Example questions UniPilot can answer

• What should I do if I miss a lecture?

• Where should I report an attendance discrepancy?

• Does a medical certificate automatically approve my absence?

Safe answer behaviour: The current source set does not establish an official minimum attendance percentage, shortage condonation rule, or attendance penalty. UniPilot must not invent one.

4. Examinations & Assessment

ILLUSTRATIVE SAMPLE POLICY – NOT AN OFFICIAL AIDTM RULE

Assessments may include quizzes, examinations, assignments, case studies, presentations, projects, laboratory work, and other course-specific activities. The assessment method and weightage should be taken from the course outline or official faculty communication.

Before an assessment

• Verify the date, time, venue or online platform from the official notice.

• Read the permitted-materials and device instructions.

• Carry the required institute identity document, if instructed.

• Clarify accessibility or genuine emergency concerns with the Programme Office in advance where possible.

If a student misses an assessment

The student should contact the course instructor and Programme Office promptly and follow the process communicated by the Institute. This draft does not establish any guaranteed retest, makeup examination, fee, or deadline.

Results and discrepancies

Students should use the official result channel and raise a marks or grade discrepancy through the process and timeline communicated by the Institute.

5. Academic Integrity & Responsible AI Use

ILLUSTRATIVE SAMPLE GUIDANCE – NOT AN OFFICIAL AIDTM RULE

Students are expected to submit work that reflects their own understanding and to acknowledge sources, collaborators, datasets, and tools as required by the course instructor.

• Do not copy another student's work or submit purchased work as your own.

• Provide citations for text, images, datasets, and ideas taken from external sources.

• Do not fabricate research findings, survey responses, references, or experimental results.

• Use generative AI only where permitted by the instructor or assignment brief.

• Review and verify AI-generated information; responsibility for submitted work remains with the student.

• Do not upload confidential institute, company, or personal data to unapproved public AI services.

If unsure whether AI use is allowed

Ask the course instructor before using an AI tool. Keep a record of the tool and the type of assistance used if disclosure is required. This draft does not specify an official plagiarism threshold or disciplinary penalty.

6. Leave, Absence & Student Support

ILLUSTRATIVE SAMPLE GUIDANCE – NOT AN OFFICIAL AIDTM RULE

For planned absence, students should follow the leave-request channel and notice period communicated by the Institute. For sudden illness or emergency, students should inform the relevant faculty member or Programme Office as soon as reasonably possible.

Suggested information for a leave request

• Student name and programme.

• Dates and expected duration of absence.

• Brief reason for the request.

• Supporting document, if required by the official process.

• Any assessment, presentation, internship, or project commitment affected.

Student support and grievance

For academic concerns, students may approach the course instructor or Programme Office. For administrative or personal concerns, they should use the appropriate official institute contact or grievance channel. UniPilot should not promise confidentiality, approval, or a resolution timeline unless an official process document confirms it.

7. Campus, Hostel & Transport Guidance

ILLUSTRATIVE SAMPLE GUIDANCE – NOT AN OFFICIAL AIDTM RULE

Campus conduct

• Follow institute instructions for classroom, laboratory, library, and event spaces.

• Respect faculty, staff, fellow students, visitors, and campus property.

• Use institute facilities for their intended purpose and report safety concerns to the appropriate authority.

Hostel

Students should refer to the current hostel allotment letter and hostel administration for accommodation eligibility, fees, visitor rules, timings, maintenance, and emergency contacts. No hostel timings, fines, curfew, or visitor restrictions are confirmed by the source files used for this draft.

Transport

Students should confirm route availability, timings, fees, pickup points, and transport-related changes through the official transport contact or notice. This draft does not establish that institute transport is available to every student.

8. SIP, Industrial Capstone & Placement Policy

SOURCE-BASED SUMMARY – AIDTM POLICY DOCUMENT, BATCH 2025–27

The following summary is drawn from the available document “Policy for Summer Internship Program (SIP), Industrial Capstone Project & Placements”, which names PGDM BDA and PGDM AI & DS, Batch 2025–27.

Purpose and academic nature

• SIP and the Industrial Capstone Project are described as mandatory academic requirements for the award of the PGDM diploma.

• The policy states that their primary objective is learning and industry exposure.

• Participation does not guarantee a Pre-Placement Offer (PPO) or final employment.

Duration and structure

• SIP: typically 5 months.

• Industrial Capstone Project: typically 4 months.

• They are scheduled between the first and second year; duration may vary with organizational requirements.

• Internship/Capstone locations may be PAN India.

Interview opportunities

• The Institute will facilitate a maximum of five interview opportunities per student for SIP and Industrial Capstone/final placements, subject to eligibility.

• Shortlisting and selection are at the recruiting organization’s discretion.

• Students may independently source opportunities, subject to prior approval and formal written intimation to the Institute.

Offer acceptance and joining

• Students must communicate offer acceptance within the timeline defined by the company and Placement Office.

• Non-communication within the stipulated time is treated as rejection.

• Once an offer is accepted, the policy states that the student is mandated to join.

• Not joining after acceptance or leaving midway after starting the internship is treated as a violation and may lead to disqualification from further processes.

• The policy states that a PPO received during SIP is mandatory to accept; non-acceptance debars the student from the entire placement drive.

Conduct, post-placement and opting out

• Recruiting organizations may terminate an internship/placement for inappropriate behaviour, non-cooperation, or continued non-performance; the policy says this may affect academic completion and placement eligibility.

• After placement, a student may participate in further placement drives only where the new offer provides at least 1.5 times the annual CTC of the existing offer. The policy gives ■6 LPA and ■9 LPA as an example.

• Acceptance of a higher offer results in withdrawal from the earlier accepted offer.

• Students opting out must formally inform the Program Office and Placement Office by email; once opted out, they cannot participate in future placement drives.

Special clause and authority

The policy contains a special clause for Adani Group employees enrolled in the PGDM programme, including restrictions on placement-drive participation and institute facilitation. It also states that AIDTM reserves the right to amend, modify, or interpret the policy and take disciplinary action for violations.

Important: Students should consult the complete signed/current policy document for exact wording and should contact the Program/Placement Office for interpretation. This handbook summary does not replace the original policy.

9. Student Conduct, Communication & Wellbeing

ILLUSTRATIVE SAMPLE GUIDANCE – NOT AN OFFICIAL AIDTM RULE

• Use respectful and professional language in emails, classrooms, group discussions, and institute platforms.

• Check official communication channels regularly and respond within the stated timelines.

• Protect passwords, identity documents, personal information, and account access.

• Report urgent safety concerns to the appropriate campus authority or emergency service.

• Seek support from a trusted faculty member or relevant institute contact when academic pressure or personal difficulties affect learning.

This section is general student-support guidance. It does not define an official AIDTM disciplinary code, counselling service, emergency number, or complaint-resolution timeline.

10. UniPilot – Frequently Asked Questions

What is UniPilot?

UniPilot is an AI-powered student support assistant created for this academic project. It helps students navigate the handbook, retrieve relevant passages from academic documents, understand programme-related information, and create support requests where enabled.

Which AI model are you using?

The planned UniPilot configuration uses OpenAI GPT-4o-mini as the language model, accessed through the OpenAI API. UniPilot should introduce itself as “UniPilot, powered by OpenAI GPT-4o-mini.” This describes the configured model, not a model developed by AIDTM.

Are you an official AIDTM authority?

No. UniPilot is a student-support project assistant. It provides information from its available documents and clearly labelled sample guidance. Official decisions must come from the Institute.

Can UniPilot answer every policy question?

It can answer questions supported by the documents in its knowledge base. If a rule is missing, unclear, or only illustrative, it should say so and direct the student to the appropriate institute office.

Can UniPilot access another student's information?

The intended system design restricts student-specific profile and support-request access to the authenticated student. A student should not be able to view another student's private records.

Can UniPilot submit a request without asking me?

Sensitive or consequential actions should require the student's explicit confirmation before execution. The system should record approved and rejected actions in its audit log.

11. Source Register and Verification Notes

Documents used

• **Policy for Summer Internship Program (SIP), Industrial Capstone Project & Placements** – PGDM BDA and AI & DS, Batch 2025–27, 5 pages. Used for Section 8.

• **Big Data Analytics.pdf** – available BDA academic-plan document. Used only as programme/academic-plan context; UniPilot should retrieve exact course details directly from the PDF when answering.

Sections requiring official verification

• Attendance percentage, shortage rules, condonation, and penalties.

• Examination eligibility, retest rules, assessment weightages, and result-grievance deadlines.

• Academic integrity definitions, plagiarism thresholds, and disciplinary consequences.

• Leave categories, application channels, and approval timelines.

• Hostel availability, fees, timings, visitor rules, and penalties.

• Transport routes, availability, fees, and schedules.

• Official student support contacts, grievance escalation, and emergency procedures.

Implementation note for UniPilot

Store this PDF in the retrieval knowledge base. Preserve the distinction between verified source sections and illustrative sections in metadata or chunk text. When answering, retrieve relevant passages, cite the document/section, and disclose when the retrieved section is illustrative. Never convert a sample number, deadline, threshold, contact, or penalty into an official rule.

End of Draft Handbook
